The First Step…

To a beautiful staircase is to select your style of handrail, newels, and balusters from our full line of quality stair parts. There are many choices and options to consider, and your stair builder will guide you toward the combinations that will suit your home and your family. For example, have you always envisioned the graceful flow of continuous handrails in your home? Or do you prefer railings that are accented by sturdy newel posts? Whichever style suits you, we offer products to create the staircase that you’ll love to use everyday.
Of the many options for you to consider, the choices you make for balusters and newel posts will create the overall style of your staircase. Iron balusters are popular also, and look great with both turned or box newel posts.

Visit our website for much more!
We offer several options, such as fluted (F), twisted (T), octagon-faceted profiles (O), or roped (R), and some balusters are available pre-primed (PR). See our website for more details on options.
